

Enrique Caballero

Senior Software Engineer

Round Rock, TX | (929) 969-1255 | cabaethernet@gmail.com | linkedin.com/in/enrique-caballero-779b3796/

PROFESSIONAL SUMMARY

Senior Software Engineer with a decade of full-stack development experience, specializing in architecting and delivering scalable web applications for Fortune 500 organizations. Deep background in modernizing legacy architectures, building high-availability frontends, and driving technical excellence across the software development life-cycle.

CORE COMPETENCIES

Full-Stack Development • System Architecture • API Design & Integration • Security by Design • SAST/DAST • OWASP Top 10 • Secure Software Architecture • Front-End Performance • React & Angular • C# / .NET Core • State Management • Agile / Scrum • CD & Test Automation

PROFESSIONAL EXPERIENCE

Exelon Corp. - Remote

Senior Software Engineer (Security Champion) 2022 - Present • Enterprise Modernization: Led a full-stack migration from SharePoint to ContentStack using Angular and C#/.NET, modernizing the architecture to improve performance and maintainability.

- **Code Quality & Mentorship:** Championed peer reviews and automated testing integration, reducing bug rates and technical debt by 30% through rigorous code quality standards.
- **Backend Architecture:** Built a decoupled ASP.NET/C# backend microservice to orchestrate data exchange and create a reliable audit trail for CSRs, optimizing data flow and system observability.

VSA Partners - New York, NY

Software Engineer 2018 - 2022 • High-Visibility UI/UX: Engineered the digital presentation of IBM's public financial data, enforcing strict version control and data integrity practices that resulted in zero discrepancies in executive-level disclosures. • **Legacy Refactoring:** Audited and refactored black-box legacy codebases across multiple stacks, resolving deprecated dependencies and logic flaws to optimize application performance.

- **High-Traffic Deployments:** Managed zero-fail release cycles with rapid hotfix and rollback strategies to maintain stability during high-traffic launch windows for Fortune 100 clients including **Google, IBM, and Meta**. • **Component Architecture:** Designed scalable React component patterns to enable modular UI development and maintainable front-end codebases across multiple enterprise client projects.

The Araca Group - New York, NY

Software Engineer 2017 - 2018 • E-Commerce Architecture: Built high-traffic Shopify and Magento storefronts with over 2 million monthly active users for major entertainment brands including HBO, Warner Bros., and DC Comics, ensuring seamless user experiences during launch events.

Elizabeth & Clarke / Independent Clients - New York, NY

Software Engineer 2014 – 2017 • Database & Backend Architecture: Designed and optimized relational database schemas (PostgreSQL, SQL Server) to support inventory management and secure customer data transactions.

- **Infrastructure Setup:** Deployed and managed web hosting environments (Nginx, Linux) and automated routine maintenance tasks to ensure high availability for early-stage e-commerce clients.

VOLUNTEER & TECHNICAL LEADERSHIP

Flight Angels - Remote

Volunteer Lead Software Engineer 2023 – Present • Platform Migration: Led full migration of the organization's website from WordPress to Shopify, improving maintainability and enabling scalable volunteer intake workflows.

- **Workflow Automation:** Built automated systems for managing rescue requests, volunteer coordination, and intake forms using Shopify apps and custom integrations.
- **Technical Leadership:** Serve as the organization's primary technical lead, responsible for platform architecture, hosting, security configuration, and ongoing feature development.

- **Engineering Mentorship:** Mentor a junior software engineer through code reviews, architectural planning, and modern development workflows to accelerate their technical growth.

TECHNICAL SKILLS

- **Cloud & CI/CD:** Azure, AWS, Docker, Kubernetes, Terraform, GitHub Actions, Linux
- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, Angular, React, Next.js, Node.js, C#, .NET Core, Python, GoLang (Go), Jest/xUnit
- **Platforms & Databases:** PostgreSQL, SQL Server, Nginx, Shopify, Magento, Postman • **Security & Tooling:** Metasploit, Nmap, Nessus, Burp Suite Pro, OWASP ZAP, Wireshark, Hashcat, OWASP Standards
- **Certification:** AWS Certified Solutions Architect – Associate (2026), CompTIA Security+ (2026)

EDUCATION

Broward College - Fort Lauderdale, FL

Bachelor of Applied Science in Information Technology, Specialization in Cybersecurity & Ethical Hacking | Expected Graduation: 2027
